Audience

This document is for any software provider who has chosen to build or update their products to allow for PAYE Modernisation.

Document context

This document provides a non-technical overview of the data items required to correct a payroll line item previously submitted to Revenue. This document is designed to be read in conjunction with rest of the Revenue Commissioners' PAYE Modernisation documentation suite including the relevant technical documents.

Correction rules

Correction types will be as follows –

Correction Type	Correction Description
1	Overpayment to the Employee that can be fixed in the next Payroll Event
2	Underpayment to the Employee that can be fixed in the next Payroll Event
3	Reporting Error that cannot be fixed in the next Payroll Event
4	Reporting Error that should be fixed in the next Payroll Event

Note on correction rules for data items:

If an Employee has been overpaid in a Payroll event e.g. if he was paid for a week he hadn't worked and the Employee actually received this overpayment, the correction to recoup this overpayment should be fixed in the next Payroll event.

No attempt should be made to adjust an under-deduction of tax where it is so large that it cannot be put right in the week or month in which it is discovered, or if to do so could cause considerable hardship to the employee. This would apply, for example, if tax had been under-deducted over a long period in the case of a weekly wage earner so that the total under-deduction amounted to a sum exceeding a week's wages. Any such case should be reported at once to Revenue who will give any instructions necessary.

Reporting errors could include an employee being omitted from the Revenue Report even though they were actually paid. The missing line item would need to be submitted to Revenue. Reporting errors could also include an employee being included in the Revenue Report even though they weren't actually paid. This line item would need to be deleted.

Submission Request Header Data Items:

Item line number	Data Item	Correction Type	Context
1	Employer Registration Number	N/A	
2	Agent Tain	N/A	
5	Tax Year	N/A	
6	Software Used	N/A	
7	Software Version	N/A	

Submission Request Line Items:

Item line number	Data Item	Correction Type	Context
8	Employee PPSN	3	<ol style="list-style-type: none"> Employers should take reasonable steps to verify that the PPSN used is correct. The PPSN checker is available to the employer in ROS The employer should delete the incorrect payslips. The employer then submits a payslip with the actual pay and actual deductions made to the employee under the correct PPSN. The employer is responsible for dealing with any data protection issues arising within their systems.
