CSV to JSON Manual Conversion

JSON File Expectation

− For an expected upload ERR submission template, see the *Expected_ERR_Upload_Template.json* file in zipped package

CSV Templates

− Add all expenses/benefits to *CSV_ExpensesBenefits_Template.csv*
− Add all line items to delete to *CSV_LineItemIDsToDelete_Template.csv*

Conversion

− Use a converter tool to convert the data from CSV to JSON format
− The tool should:
  o Output the correct date format is created in JSON (yyyy-mm-dd)
  o Null values in CSV are considered null in JSON
  o Nested objects and arrays are recreated (headings use /)
    e.g.

JSON Template set up

− Copy the full output from the conversion tool into *the JSON_Root_Template.json* file where specified for each.
− Update any header field values as required such as employer number, run reference, submission id etc.

No expenses/benefits?
Delete the following lines from the *JSON_Root_Template.json* file

```
10        "expensesBenefits":
11        "!!! ITEMS CONVERTED FROM CSV_ExpensesBenefits_Template HERE !!!"
12
13
```

No line items for deletion?
Delete the following lines from the *JSON_Root_Template.json* file

```
13        ,
14        "lineItemIDsToDelete":
15        "!!! ITEMS CONVERTED FROM CSV_LineItemIDsToDelete_Template HERE !!!"
```
